MANAGEMENT'S DISCUSSION AND ANALYSIS
JUNE 30, 2019 and 2018

This section of the annual financial report of the Woodside Fire Protection District (District) presents our discussion and analysis of the District's financial performance during the fiscal year ended June 30, 2019. The Management's Discussion and Analysis (MD&A) should be read in conjunction with the District's financial statements, including the notes and the supplementary information that immediately follow this section.

#### FINANCIAL HIGHLIGHTS

The following summarizes the District's financial highlights for the year ended June 30, 2019.

- In total, government-wide net position was \$5,962,524.
- General revenues accounted for \$21,912,467 or 99.30 percent.
- Total government-wide assets were \$46,175,781, cash and cash equivalents were \$26,823,794 and net capital assets totaled \$9,812,397.
- Total program expenses were \$15,054,466 as noted in table 2.

#### OVERVIEW OF FINANCIAL STATEMENTS

This annual report consists of three parts: management's discussion and analysis (this section), the basic financial statements and required supplementary information. The basic financial statements include two kinds of statements that present different views of the District.

The first two statements are government-wide financial statements that provide both short-term and long-term information about the District's overall financial status.

The remaining statements are fund financial statements that focus on individual parts of the District, reporting the District's operation in more detail than the government-wide statements.

The fund financial statements are composed of:

• Governmental fund statements, which tell how basic services were financed in the short-term, as well as what remained for future spending.

## **OVERVIEW OF FINANCIAL STATEMENTS** (Continued)

## The Statement of Net Position and the Statement of Activities

The statement of net position and statement of activities report information about the District as a whole and its activities. These statements include all assets and liabilities of the District using the accrual basis of accounting, which is similar to the accounting used by most private-sector companies. All of the current year's revenues and expenses are taken into account regardless of when cash is received or paid.

These two statements report the District's net position and changes in them. Net position are the difference between assets and liabilities, which is one way to measure the District's financial health, or financial position. Overtime increases or decreases in the District's net position are one indicator of whether its financial health is improving or deteriorating. To assess the overall health of the District, you need to consider additional non-financial factors including the condition the District's buildings and other facilities.

## REPORTING THE DISTRICT'S MOST SIGNIFICANT FUNDS

## Fund financial statements

The fund financial statements provide more detailed information about the District's most significant funds – not the District as a whole. Funds are accounting devices the District uses to record specific sources of funding and spending on particular programs:

- Some funds are required by law and covenants.
- The District establishes other funds to control and manage money for particular purposes or to show that certain revenues have been properly used.

## Governmental funds

Most of the District's basic services are reported in governmental funds which generally focus on how money flows into and out of those funds and the balances left at year end that are available for spending. These funds are reported using the modified accrual basis of accounting, which measures cash, and all other financial assets that can readily be converted to cash. The governmental fund statements provide a detailed short-term view of the District's general government operations and the basic services it provides. Governmental fund information helps determine whether there are more or fewer financial resources that can be spent in the near future to finance the District's programs. Because this information does not encompass the additional long-term focus of the government-wide statement, we provide additional information of the governmental fund statements that explain the relationship (or differences) between them.

## **Report on the Financial Statements**

We have audited the accompanying financial statements of Woodside Fire Protection District (the District) as of and for the years ended June 30, 2019 and 2018, and the related notes to the financial statements, which collectively comprise the District's basic financial statements as listed in the table of contents.

## Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

## **Auditor's Responsibility**

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the State Controller's minimum audit requirements for California Special Districts. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

## **Opinions**

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the Woodside Fire Protection District, as of June 30, 2019 and 2018, and the respective changes in financial position, and, where applicable, cash flows thereof for the years then ended in accordance with accounting principles generally accepted in the United States of America.

#### **Other Matters**

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis on pages 1 through 6, budgetary comparison schedule on page 32, and schedule of required supplementary information- Safety and Miscellaneous pension plan on page 34 to be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

## 1. ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES

#### A. The District

The original Woodside Fire Protection District was created under the 1881 Act and later incorporated on July 19, 1925. By election of the voters of the District, it was reorganized on January 25, 1949, pursuant to the Health and Safety Code of the State of California under the name of Woodside Fire Protection District. On September 11, 1962, the District was reorganized under the Fire Protection District Law of 1961.

The District maintains three fire houses which are located in Woodside, Portola Valley, and Emerald Lake. The District extends from Woodside through Portola Valley to Skyline and to Emerald Lake, north of Redwood City.

The District's financial statements reflect its own activities; it has no component units (i.e., other government overseen by the District.)

#### B. Basis of Presentation

#### Government-Wide Financial Statements:

The government-wide financial statements (i.e., the statement of net position and the statement of activities) report information on all of the activities of the District.

The government-wide statements are prepared using the economic resources measurement focus. This is the same approach used in the preparation of the proprietary fund and fiduciary fund financial statement but differs from the manner in which governmental fund financial statements are prepared. Governmental fund financial statements, therefore, includes a reconciliation with brief explanations to better identify the relationship between the government wide-statements and the statements for the governmental funds.

The government-wide statement of activities presents direct expenses and program revenues for each function or program of the District's governmental activities. Direct expenses are those that are specifically associated with a service, program, or department and are therefore clearly identifiable to a particular function.

NOTES TO THE FINANCIAL STATEMENTS
JUNE 30, 2019

## 1. ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES (Continued)

## B. <u>Basis of Presentation</u> (Continued)

The District does not allocate indirect expenses to functions in the statement of activities. Program revenues include charges paid by the recipients of goods or services offered by a program, as well as grants and contributions that are restricted to meeting the operational or capital requirements of a particular program. Revenues that are not classified as program revenues are presented as general revenues of the District, with certain exceptions. The comparison of direct expenses with program revenues identifies the extent to which each governmental function is self-financing or draws from the general revenues of the District.

#### Fund Financial Statements:

Fund financial statements report detailed information about the District. The focus of governmental fund financial statements is on major funds rather than reporting funds by type. Each major governmental fund is presented in a separate column, and all non-major funds are aggregated into one column. All of the District's funds were considered major.

The accounting and financial treatment applied to a fund is determined by its measurement focus. All governmental funds are accounted for using a flow of current financial resources measurement focus. With this measurement focus, only current assets and current liabilities are generally included on the balance sheet. The statement of revenues, expenditures, and changes in fund balances for these funds present increases (i.e., revenues and other financing sources) and decreases (i. e., expenditures and other financing uses) in net current assets.

## C. Basis of Accounting

Basis of accounting refers to when revenues and expenditures are recognized in the accounts and reported in the financial statements. Government-wide financial statements are prepared using the accrual basis of accounting. Governmental funds use the modified accrual basis of accounting.

Governmental funds are generally accounted for using the modified accrual basis of accounting. Their revenues are recognized in the accounting period in which they become both measurable and available to finance expenditures of the current fiscal period. Revenues considered susceptible to accrual include property taxes and interest income. Expenditures are recognized in the accounting period in which the liability is incurred (when goods are received or services are rendered).

## 1. ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES (Continued)

### D. Fund Accounting

The accounts of the District are organized on the basis of funds, each of which is considered a separate accounting entity. The operations of each fund are accounted for with a separate set of self-balancing accounts that comprise its assets, liabilities, fund equity, revenues and expenditures or expenses, as appropriate. District resources are allocated to and accounted for in individual funds based upon the purpose for which they are to be spent and the means by which spending activities are controlled. The fund types and funds utilized by the District are described as follows:

### Major Governmental Funds:

General Fund - The general fund is the general operating fund of the District. It is used to account for all financial resources except those required to be accounted for in another fund.

### E. Budgets and Budgetary Accounting

The District's annual or final budget is the initial budget and any revisions to the budget that have been approved by the Board of Directors. The Board may amend the budget during the fiscal year.

#### F. Cash and Investments

Cash balances held in banks and revolving funds are insured up to \$250,000 per institution by the Federal Depository Insurance Corporation ("FDIC"). All cash held by the financial institutions is fully insured or collateralized, except the amount that exceeds the maximum insured levels of the FDIC.

The District pools cash from all sources except for its Employee Deferred Compensation Plan, and invests these funds in the County of San Mateo Treasury investment pool and the State of California Local Agency Investment Fund for the purpose of increasing income through investment activities.

Since the adjustment to market value, as required by accounting procedures generally accepted in the United States, is not material to the financial statements of the District, all investments are carried at cost.

## 1. ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES (Continued)

## G. Capital Assets

Capital assets are reported at historical cost or estimated historical cost. Contributed assets are reported at fair market value as of the date received. Additions, improvements, and other capital outlay that significantly extend the useful life of an asset are capitalized. The cost of normal maintenance and repairs that do not add to the value of the assets or materially extend the asset's lives are not capitalized, but are expensed as incurred.

Depreciation and all capital assets are computed using a straight-line basis over the following estimated useful lives:

		Estimated Useful Life in
Asset Class	Assets	Years
Land	Land	•
<b>Building &amp; Improvements</b>	Fire Stations, Additions	7-50
Machinery and Equipment	Fire Engines, Fire Apparatus,	
	Furniture, Computers	3-20

## H. Compensated Absences

Accumulated vacation benefits are recognized as a liability of the District in the General Fund. As of June 30, 2019, the total accrued vacation subject to redemption amounted to \$2,232,091.

Administrative personnel accrue 8 hours of vacation per day accrued and the firefighters accrue 24 hours of vacation per day accrued.

Full time employees earn annual vacation hours based on their term of employment as follows:

Years of Service	Administrative	Fire Fighter
1-5	136 hrs	144 hrs
6-10	176 hrs	192 hrs
11-15	216 hrs	264 hrs
15-20	248 hrs	312 hrs
20-25	280 hrs	360 hrs
25+	312 hrs	408 hrs

## 1. ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES (Continued)

## I. Long -Term Obligations

In the government-wide financial statements, long-term debt and other long-term obligations are reported as liabilities in the statement of net position.

In the fund financial statements, the face amount of the debt issued, premiums, or discounts are reported as other financing sources/uses.

## J. Fund Balance Reserves

Reservations of the ending fund balance indicate the portions of fund balance not appropriable for expenditures or amounts legally segregated for a specific future use. These amounts are not available for appropriation and expenditure at the balance sheet date.

#### K. Net Position

Net position represents the difference between assets and liabilities. Net position invested in capital assets, net of related debt consists of capital assets, net of accumulated depreciation, reduced by the outstanding balances of any borrowings used for the acquisition, construction, or improvement of those assets. Net position is reported as restricted when there are limitations imposed on their use either through the enabling legislation adopted by the District or through external restrictions imposed by creditors, grantors, laws or regulations of other governments. The District applies restricted resources when an expense is incurred for purposes for which both restricted and unrestricted net assets are available.

#### L. Use of Estimates

The District's management has made certain estimates and assumptions relating to the reporting of assets and liabilities and the disclosure of contingent assets and liabilities to prepare these financial statements in conformity with generally accepted accounting principles. Actual results could differ from those estimates.

## M. Post-Employment Health Care Benefits

The District provides certain health care benefits for retired employees. Substantially all of the District employees may become eligible for benefits if they reach the normal retirement age while working for the District. The cost of retirement health care benefits is recognized as an expenditure of health care premiums paid. See note 12 for more information regarding Post-Employment Health Care Benefits.

## 2. PROPERTY TAX LEVY, COLLECTION, AND MAXIMUM RATES

The State of California Constitution Article XIII A provides that the combined maximum property tax rate on any given property may not exceed one percent of its assessed value unless an additional amount for general obligation debt has been approved by voters. Assessed value is calculated at 100% of market value as defined by Article XIII A and may be adjusted by no more than two percent per year unless the property is sold, transferred or improved. The State Legislature has determined the method of distribution of receipts from a one percent tax levy among the county, cities, school District's and other District's. The District's property tax revenues include only property taxes resulting from increased assessed values on property within the District's Plan area.

The County of San Mateo assesses properties, bills for, and collects property taxes. The term "unsecured" refers to taxes on personal property other than real estate, land and buildings. These taxes are secured by liens on the property being taxed.

Property taxes levied are recorded as revenue when received, in the fiscal year of levy, due to the adoption of the "alternate method" of property tax distribution, known as the Teeter Plan, by the County of San Mateo. The Teeter Plan authorizes the auditor/controller of the County of San Mateo to allocate 100% of the secured property taxes billed, but not yet paid. The County of San Mateo remits tax monies to the District in three installments.

## 3. CASH AND CASH INVESTMENTS

The District's remaining cash and investments were deposited with Treasurer of the County of San Mateo. The District is considered to be an involuntary participant in the external investment pool. Interest is deposited into District funds. The county is restricted by Government Code Section 53635, pursuant to Section 53601, to invest in time deposits, U.S. government securities, state registered warrants, notes or bonds, State Treasurer's investment pool, bankers' acceptances, commercial paper, negotiable certificates of deposit, and repurchase or reverse repurchase agreements. The county also acts as the District's fiscal agent and cash with fiscal agent, if any, is held in a separate account with the county as noted in the below summary.

Cash and investments consisted of the following as of June 30, 2019 and 2018:

	2019	2018
Cash and Investments:		
San Mateo County Investment Pool	\$ 26,823,794	\$ 22,780,377

### 4. CAPITAL ASSETS

On July 21, 1986, June 30, 2001, and June 30, 2011, a physical inventory of fixed assets was taken. An analysis of capital asset balances as of June 30, 2019 is as follows:

## 5. <u>DISPATCH OPERATION JPA</u>

The District has entered into an agreement with the following public agencies located in the County of San Mateo: Menlo Park Fire Protection District, San Carlos Fire Department, Belmont Fire Protection District, the City of Redwood City, and San Mateo County Fire Department and Coastside Fire Protection District. Under this Joint Powers Agreement, a separate public entity known as the "Fire Net Six Joint Powers Authority" (the Authority) was established pursuant to Chapter 5 of Division 7 of Title 1 of the California Government Code (Section 6500, et seq.) in order to jointly address common issues presented by the development of a consolidated dispatch operation operated by the County of San Mateo. The District, as a member of the Authority is responsible for contributing its proportionate share of the costs for dispatch services and associated expenses. The Joint Powers Agreement, dated April 28, 1994, will provide a more detailed description of the obligations and funding requirements of the District.

## 6. <u>DISTRICT EMPLOYEES RETIREMENT PLAN (DEFINED BENEFIT PENSION PLAN)</u>

## A. Plan Description

The District contributes to the California Public Employees Retirement System (CalPERS), an agent multiple-employer public retirement system that acts as a common investment and administrative agent for participating public entities within the State of California. Copies of CalPERS annual financial report may be obtained from their Executive Office – 400 Q Street, Sacramento, CA 95814.

## **DEFINED BENEFITS PENSION PLANS - (Safety Plan and Miscellaneous Plan)**

The District provides eligible employee's pension plans benefits through the Woodside Fire Protection Services District – Safety Plan and Miscellaneous Plan.

## Plan Description, Benefits Provided and Employees Covered

The plan is a cost-sharing multiple-employer defined benefit pension plan administered by the California Public Employees; Retirement System (CalPERS). A full description of the pension plan benefit provisions, assumptions for funding purposes but not accounting purposes, and membership information is listed in the June 30, 2018 Annual Actuarial Valuation Report. Details of the benefits provided can be obtained in Appendix B of the June 30, 2018 actuarial valuation report. This report is a publicly available valuation report that can be obtained at CalPERS' website under Forms and Publications.

## 6. <u>DISTRICT EMPLOYEES RETIREMENT PLAN (DEFINED BENEFIT PENSION PLAN</u> (Continued)

**Contribution Description** 

Section 20814(c) of the California Public Employees' Retirement Law (PERL) requires that the employer contribute ion rates for all public employers are determined on an annual basis by the actuary and shall be effective on the July 1 following notice of a change in the rate. The total plan contributions are determined through the CalPERS' annual actuarial valuation process. For public agency cost-sharing plans covered by either the Miscellaneous or Safety risk pools, the Plan's actuarially determined rate is based on the estimated amount necessary to pay the Plan's allocated share of the risk pool's costs of benefits earned by employees during the year, and any unfunded accrued liability. The employer is required to contribute the difference between the actuarially determined rate and contribution rate of employees. For the measurement period ended June 30, 2018 (the measurement date), the active employee contribution rate is 8.989 percent of annual pay, and the average employer's contribution rate is 22.346 percent of annual payroll. The unfunded accrued liability contribution is 13.334 percent. Employer contributions rates may change if plan contracts are amended.

Actuarial Methods and Assumptions Used to Determine Total Pension Liability

For the measurement period ending June 30, 2018 (the measurement date), the total pension liability was determined by rolling forward the June 30, 2017 total pension liability. Both the June 30, 2017 total pension liability and the June 30, 2018 total pension liability were based on the following actuarial methods and assumptions.

Actuarial Cost Method Entry Age Normal in accordance with the requirements

of GASB Statement No. 68

**Acturial Assumptions** 

Increase

Discount Rate 7.65% (2015), 7.65% (2016), 7.15% (2017), 7.15% (2018)

Inflation 2.75% (2017), 2.50% (2018)

Salary Increases Varies by Entry Age and Service

#### Discount Rate

The discount rate used to measure the total pension liability was 7.15 percent. To determine whether the municipal bond rate should be used in the calculation of a discount rate for each plan, CalPERS stress tested plans that would most likely results in a discount rate that would be different from the actuarially assumed discount rate. Based on the testing, none of the tested plans run out of assets. Therefore, the current 7.15 percent discount rate is adequate, and the use of the municipal bond rate calculation is not necessary. The long term expected discount rate of 7.15 percent is applied to all plans in the Public Employees Retirement Fund. The stress test results are presented in a detailed report called "GASB Crossover Testing Report" that can be obtained at CalPERS' website under the GASB 68 section.

The table below reflects long-term expected real rate of return by asset class. The rate of return was calculated using the capital market assumptions applied to determine the discount rate and asset allocation. These geometric rates of return are net of administrative expenses.

Asset Class	New Stragetic Allocation	Real Return Years 1 - 10	Real Return Years 11 +
Global Equity	50.0%	4.8	5.98%

Medical Expense	\$ 5,000	per occurrence

## 8. <u>CONTINGENCIES</u>

Litigation – No claims involving the District are currently outstanding. Management believes that there are no material adverse effects on the District's financial position or results of operations.

NOTES TO THE FINANCIAL STATEMENTS JUNE 30, 2019

### 9. FUND BALANCE CLASSIFICATIONS

The District has adopted the provisions of GASB Statement No. 54 Fund Balance and Governmental Fund Type Definitions. GASB 54 establishes Fund Balance classifications based largely upon the extent to which a government is bound to observe constraints imposed upon the use of the resources reported in governmental funds. The Governmental Fund statements conform to this new classification. The Fund Financial Statement consist of Nonspendable, Restricted, Committed, Assigned and Unassigned amounts as described on the following page.

<u>Non-Spendable</u>: Items that cannot be spent because they are not in spendable form, such as prepaid items, items that are legally or contractually required to be maintained intact, such as principal of an endowment or revolving loan fund. As of June 30, 2019, the District accumulated \$39,568 of non-spendable fund balance.

<u>Restricted:</u> Restricted fund balances encompass the portion of net fund resources subject to externally enforceable legal restrictions. This includes externally imposed restrictions by creditors (such as through debt covenants), grantors, contributors, law or regulations of other governments, as well as restrictions imposed by law through constitutional provision or enabling legislation.

<u>Committed:</u> Committed fund balances encompass the portion of net fund resources, the use of which is constrained by limitations that the government imposes upon itself at its highest level of decision making (normally the governing body) and that remain binding unless removed in the same manner. As of June 30, 2019, the District accumulated \$26,950,800. of committed fund balance.

<u>Assigned:</u> Assigned fund balances encompass the portion of net fund resources reflecting the government's intended use of resources. Assignment of resources can be done by the highest level of decision making or by a committee or official designated for that purpose.

<u>Unassigned:</u> This category is for any balances that have no restrictions placed upon them.

NOTES TO THE FINANCIAL STATEMENTS JUNE 30, 2019

## 9. <u>FUND BALANCE CLASSIFICATIONS</u> (Continued)

The District established the following policies relating to its fund balance classifications.

#### 1. Committed Fund Balances

- Highest Level of Decision-Making Authority the Board of Directors of the
  District are acknowledged as the highest level of decision-making authority in
  terms of establishing fund balance classifications and creating committed fund
  balances.
- Formal Action Required the Board shall have the authority to establish, modify or rescind committed fund balances by Resolution, where appropriate, passed by a majority vote.
- Timing the Board will take formal action to commit any resources as soon as possible upon determining its desire to take such action, but no later than June 30 of the fiscal year in which it applies in order for the action to be valid for the presentation of the annual report.

## 2. Assigned Fund Balances

• Approval Authority – the Board has not delegated the authority to assign fund balance amounts.

## 3. Expenditure of Funds - Order of Expenditure

- Restricted and Unrestricted Funds when expenditure is incurred for purposes for which both restricted and unrestricted fund balances are available, the District shall consider that restricted funds shall be spent first until such funds are exhausted, at which time committed, assigned, or unassigned funds will be used.
- Committed, Assigned or Unassigned Funds when an expenditure is incurred
  where there are no restricted funds available, and for which committed and
  assigned fund balances are available, the District shall exhaust unassigned funds
  first unless the board determines the use of available assigned or committed fund
  balances are appropriate.

### 10. OTHER POSTEMPLOYMENT BENEFITS

The District implemented GASB Statement No. 75, Financial Reporting for Postemployment Benefit Plans (OPEB) other than Pension Accounting and Financial Reporting by Employers for Postemployment Benefits other than Pension Plans in FYE 2019. The District provides certain health care benefits which are recognized as an expenditure of health care premiums paid.

#### **Discount Rate:**

The discount rate is based on a blend of (a) the long-term expected rate of return of assets for benefits covered by plant assets and a yield or index for 20-year, tax-exempt general obligations municipal bonds with an average rating of AA/Aa or better for benefits not covered by plan assets.

	June 30, 2017	June 30, 2018
Discount Rate	7.00%	7.00%

The prior period adjustment is due to the GASB 75 OPEB liability adjustment. The GASB 75 become effective for fiscal year ending June 30, 2018. The effect of GASB 75 significantly increased the OPEB liability reported in the Statement of Net Position, which was reported as prior period adjustment of \$(14,278,887) in fiscal year 2018. There were no prior period adjustments in fiscal year 2019.
